

The Problem

Customers demand a quick and seamless dining experience

It's good to be a customer. With an explosion of quick service restaurants expanding their pick-up and delivery options, customers can afford to be choosy. For QSRs, however, increased competition requires innovative thinking to distinguish themselves in the marketplace.

What makes QSRs unique is not what they sell, it's customer experience. To stand out, restaurants must provide a better dining experience

- 70% of QSR revenue comes from the drive-thru, so enhancing drive-thru customer experience is more important than ever
- 27% of customers complained wait times got significantly worse in the past year
- 7/10 restaurant operators do not have enough employees to support demand at their restaurants
- There are approximately 5.5 million more job openings than there are workers available to fill them
- 71% of customers report feeling angry when their order is fulfilled incorrectly
- Installing Order Confirmation Boards (OCBs) only increased order accuracy by 2%

90% Computer vision can reduce drive-thru errors by as

78% of customers say convenience is their number one drive-thru draw.

30% Chik-fil-A estimates 30% of people drive away, because the lines are too long.

The Solution

Deliver the ultimate dining experience with alwaysAl Smart Restaurants

In order to provide the most seamless and convenient experience, QSRs need data. alwaysAl not only provides data about customers, wait times and restaurant productivity, it provides it in real-time so managers can make better business decisions immediately.

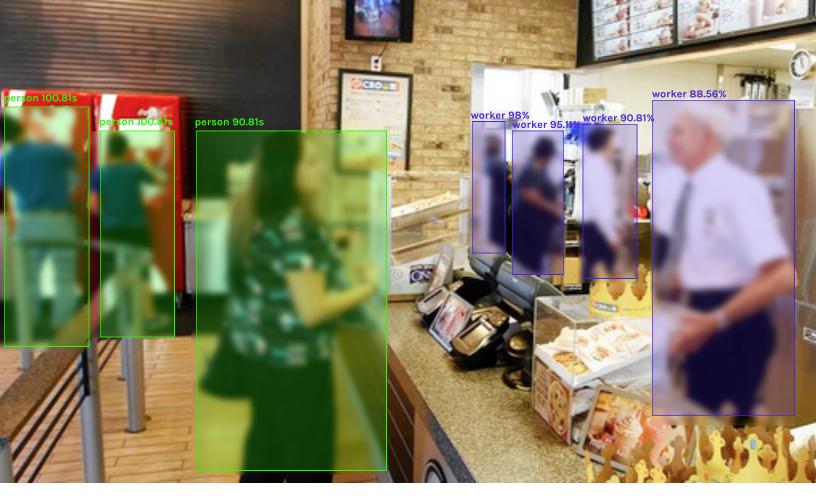

With increased labor shortages, QSRs need to take advantage of every opportunity to automate processes.

alwaysAl Smart Restaurants allows you to:

- Reduce wait times at checkouts and drive-thrus with immediate alerts when lines get long
- Count cars to optimally staff restaurants during peak hours
- Monitor traffic in and out of drive-thrus to improve wait times
- Count customers to improve speed of service for those dining in
- Protect customer privacy with facial blurring

alwaysAl Smart Restaurants advantages:

- Make better staffing decisions
- Get real-time alerts to optimize foot/vehicle traffic
- Provide more personalized dining experiences
- Enjoy Increased revenue

alwaysAI Smart Restaurants enables intelligent decisions in an instant by leveraging computer vision with your current camera infrastructure. With alwaysAI, you can improve the Quick Service Dining experience, and get real-time insights about vehicle traffic, occupancy, profits, and overall restaurant performance.
